Description

Wessels Severe Service NA series are ASME 304 stainless steel storage vessels. They are designed for commercial and industrial systems that require internal and external protection that is more robust than traditional fabricated plain steel designs. They can be used to store water and absorb the expansion forces to control the pressure in heating/cooling and hydro-pneumatic systems.

Construction

Shell: Stainless Steel

Heads: Stainless Steel

Performance Limitations

Maximum Design Temperature: 450°F

Maximum Design Pressure: 125 PSI**

*316L Stainless steel available

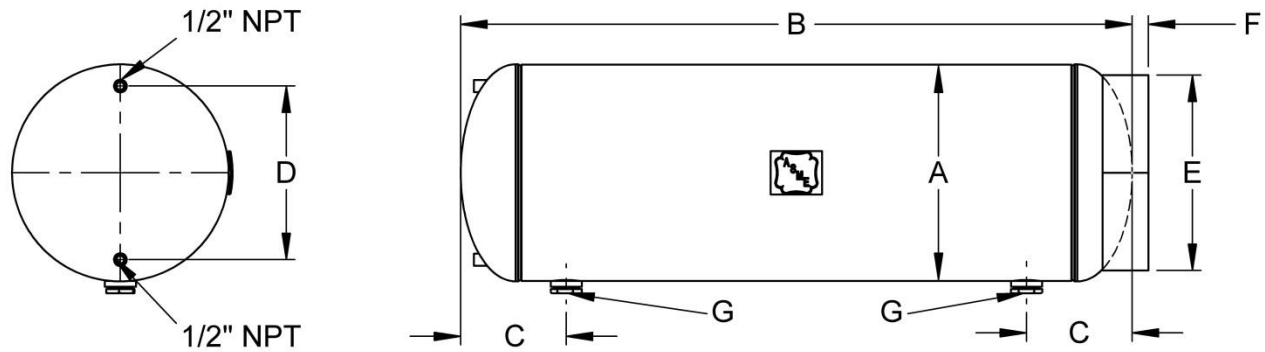

**200 & 250 PSIG available

Typical Specification

Furnish and install, as shown on plans, a _____ gallon _____" diameter X _____" long 304 stainless steel expansion tank as manufactured by Wessels Company. The tank shall have NPT system connections, sight glass openings, and drain. The tank shall be furnished with saddles if mounted horizontally and a base ring for vertical storage. The tank must be constructed with most recent addendum of Section VIII Division 1 of the ASME Boiler and Pressure Vessel Code.

Each tank shall be Wessels model numbers SS- _____ NA _____ or approved equal.

SS-12NA33 thru SS-36NA93
